OFFSHORE RACING ENVIRONMENTAL CODE

World Sailing is committed to the promotion of care for the environment. In offshore racing we will:

- use holding tanks where fitted and empty at a pump-out station or more than 3 miles offshore,
- in the bilges use oil collection pads and dispose properly ashore,
- use environmentally friendly cleaning products suitable for the marine environment,
- retain garbage on board for recycling or disposal ashore except on a long voyage when biodegradable waste may be discharged overboard,
- avoid the use of 2-stroke engines (except advanced models with pollution control)
- use shore toilets when in port,
- observe International Maritime Organization (IMO) guidelines on biofouling,
- use solar, waterpower or wind charging when appropriate and
- encourage new offshore racing boats (OSR Cat 0, 1 & 2) constructed after 2022, to produce at least 20% of their power requirements using renewable energy sources whilst racing.

DIAGRAMMATIC GUIDE

INTRODUCTION

The Special Regulations Sub-Committee was created in 1967 by the newly formed Offshore Rule Co-ordinating Committee, later the Offshore Racing Council now the Offshore Racing Congress. As the horizons of offshore racing extended into round-the world and multihull activities, so too did the scope of Special Regulations, which now cover racing in seven categories. Interpretations, amendments, and also extract files for particular categories and boat types, are available on the World Sailing web site (https://www.sailing.org/inside-world-sailing/rules-regulations/offshore-special-regulations/).

Copyright

When reprinting these regulations Member National Authorities and Organising Authorities should:

- request copyright permission from World Sailing and ORC Ltd (normally given free of charge),
- display a copyright acknowledgement with the reprint (similar to © ORC Ltd. 2002, amendments 2003-2024 © World Sailing Limited),
- make any amendments by deleting contrary provisions,
- indicate that changes have been made, and
- supply a copy of the reprint to each of World Sailing and ORC Ltd.

Official interpretations shall take precedence over these Special Regulations and will be indexed, numbered, dated and displayed on the World Sailing web site:

https://www.sailing.org/inside-world-sailing/rules-regulations/offshore-special-regulations/

Language & Abbreviations Used

Mo - Monohull

Mu - Multihull

** - means the item applies to all types of boat in all Categories except 5 for which see Appendix B or 6 for which see Appendix C

The use of the masculine gender shall be taken to mean either gender.

Style Conventions Used

RED TYPE indicates a significant change in 2024.

DOUBLE UNDERLINE TYPE indicates a term defined in the Offshore Special Regulation 1.03.1.

ITALIC TYPE indicates a term defined in the Racing Rules of Sailing.

Other than in headings or in offshore special regulation 1.02.1, **BOLD BLACK TYPE indicates** a term defined in the Equipment Rules of Sailing.

BOLD BLUE TYPE indicates a {state your member national authority here} prescription.

BOLD GREEN TYPE indicates a {state your race here} prescription.

Guidance notes and recommendations have been removed from the Regulations and are available on: https://www.sailing.org/inside-world-sailing/rules-regulations/offshore-special-regulations/

Administration

The Offshore Special Regulation are administered by the World Sailing Special Regulation Sub-Committee whose terms of reference (available at: https://www.sailing.org/inside-world-sailing/rules-regulations/constitution-regulations/) are as follows:

World Sailing Regulation 6.9.8.3 - The Special Regulations Sub-Committee shall:

- (a) be responsible for the maintenance, revision and changes to the World Sailing Offshore Special Regulations governing offshore racing, under licence from ORC Ltd. Such changes shall be biennial with revised editions published in January of each even year, except that matters of an urgent nature affecting safety may be dealt with by changes to the Regulations on a shorter time scale.
- (b) monitor developments in offshore racing relative to the standards of safety and seaworthiness.

Any queries please email: technical@sailing.org

SECTION 1 – FUNDAMENTAL AND DEFINITIONS

Categories	1.01	Purpose and Use
**	1.01.1	The purpose of the Offshore Special Regulations (<u>OSR</u>) is to establish uniform minimum equipment, accommodation and training standards for monohull and multihull (excluding proa [asymmetrical catamaran]) boats racing offshore.
**	1.01.2	The <u>OSR</u> do not replace, but supplement, the requirements of governmental authority, Classification Society certification, the Racing Rules of Sailing (<u>RRS</u>), Equipment Rules of Sailing (ERS), class rules and rating systems.
**	1.01.3	Use of the <u>OSR</u> does not guarantee total safety of the boat and her crew. Particular attention is drawn to the description of <u>OSR</u> for inshore racing which includes that adequate shelter and or effective rescue is available all along the course. This is not included in more onerous <u>OSR</u> categories.
	1.02	Responsibility of Person in Charge
**	1.02.1	Under <u>RRS</u> 3 the responsibility for a boat's decision to participate in a race or continue racing is hers alone. The safety of a boat and her crew is the sole and inescapable responsibility of the <i>person in charge</i> who shall do his best to ensure that the boat is fully found, thoroughly seaworthy and manned by an experienced and appropriately trained crew who are physically fit to face all weather. The <i>person in charge</i> shall also assign a person to take over his responsibilities in the event of his incapacitation.
**	1.02.2	Neither the establishment of the <u>OSR</u> , nor their use by <i>organising authorities</i> , nor the inspection of a boat under the <u>OSR</u> in any way limits or reduces the complete and unlimited responsibility of the <i>person in charge</i> .
**	1.02.3	By participating in a race conducted under the <u>OSR</u> , the <i>person in charge</i> , each competitor and boat owner agrees to reasonably cooperate with the <i>organising authority</i> and World Sailing in the development of an independent incident report as specified in <u>OSR</u> 2.02.
	1.03	Definitions, Abbreviations, Word Usage
**	1.03.1	Table 1 – Definitions of Terms used in this document Abbreviation Description

Abbreviation	Description
#	Pound force (lbf)
ABS	American Bureau of Shipping
AIS	Automatic Identification Systems
Coaming	The part of the cockpit, including the transverse after limit, over which water would run when the boat is floating level and the cockpit is filled to overflowing
COLREGS	International Regulations for Preventing Collisions at Sea
Contained Cockpit	A cockpit where the combined area open aft to the sea is less than 50% maximum cockpit depth x maximum cockpit width
Crewmember	Every person on board
DSC	Digital Selective Calling
EN	European Norm
EPIRB	Emergency Position-Indicating Radio Beacon
ERS	World Sailing - Equipment Rules of Sailing
First Launch	Month & year of the first launching when the individual boat, was completed and equipped for sailing
GMDSS	Global Maritime Distress & Safety System
GNSS	Global Navigation Satellite System
GPS	Global Positioning System
Hatch	The term hatch includes the entire hatch assembly including the lid or cover as part of that assembly
НМРЕ	High Modulus Polyethylene (Dyneema®/Spectra® or equivalent)

IBRD	International Beacon Registration Database
IMO	International Maritime Organization
ISAF	International Sailing Federation – (now World Sailing)
ISO	International Standard Organization or International Organization for Standardization
Jackstay	A <u>securely fastened</u> webbing or rope which permits a <u>crewmember</u> to move from one part of the boat to another without having to unclip a safety harness <u>tether</u>
L _H	Hull Length as defined by the ERS
Lifeline	Rope or wire line rigged as guardrail/guardline around the deck
LSA	IMO International Life-Saving Appliance Code
L _{WL}	(Length of) loaded waterline
Moveable Ballast	Material carried for the sole purpose of increasing weight and/or influencing stability and/or trim and which may be moved transversely but not varied in weight while a boat is racing
ORC	Offshore Racing Congress (formerly Offshore Racing Council)
OSR	Offshore Special Regulation(s)
Permanently Installed	The item is effectively built-in by e.g. bolting, welding, glassing etc. and may not be removed for or during racing
PLB	Personal Locator Beacon
Rode	Rope, chain, or a combination of both, which is used to connect an anchor to the boat
RRS	World Sailing – Racing Rules of Sailing
Securely Fastened	Held strongly in place by a method (e.g. rope lashings, wing nuts) which will safely retain the fastened object in severe conditions including a 180° capsize and allows for the item to be removed and replaced during racing
SOLAS	Safety of Life at Sea Convention
STCW	Standards of Training, Certification and Watchkeeping for Seafarers
SSS	The Safety and Stability Screening numeral
STIX	ISO 12217-2 Stability Index
Tether	A safety line used to connect a safety harness to a strong point or <u>Jackstay</u>
Variable Ballast	Water carried for the sole purpose of influencing stability and/or trim and which may be varied in weight and/or moved while a boat is racing.
World Sailing	formerly the International Sailing Federation or <u>ISAF</u>

1.03.2 The words "shall" and "must" are mandatory, and "should" and "may" are permissive.

SECTION 2 – APPLICATION & GENERAL REQUIREMENTS

2ECITON 7	<u> </u>	PLICATION & GENERAL REQUIREMENTS
Categories	2.01	Categories of Events
**		Organising authorities shall select from one of the following categories and may modify the
		OSR to suit local conditions.
	2.01.1	Category 0
MoMu0		Trans-oceanic races, including races which pass through areas in which air or sea
		temperatures are likely to be less than 5°C (41°F) other than temporarily, where boats
		must be completely self-sufficient for very extended periods of time, capable of
		withstanding heavy storms and prepared to meet serious emergencies without the
		expectation of outside assistance.
	2.01.2	Category 1
MoMu1		Races of long distance and well offshore, where boats must be completely self-sufficient for
		extended periods of time, capable of withstanding heavy storms and prepared to meet
		serious emergencies without the expectation of outside assistance.
	2.01.3	Category 2
MoMu2		Races of extended duration along or not far removed from shorelines or in large,
		unprotected bays or lakes, where a high degree of self-sufficiency is required of the boats.
	2.01.4	Category 3
MoMu3		Races across open water, most of which is relatively protected or close to shorelines.
	2.01.5	Category 4
MoMu4		Short races, close to shore in relatively warm or protected waters normally held in daylight.
	2.01.6	Special Regulations – for Inshore Racing
		Short races, close to shore in relatively warm and protected waters where adequate shelter
		and/or effective rescue is available all along the course, held in daylight only (refer to
	2 04 7	Appendix B).
	2.01.7	
		Short races in boats that may not be self-sufficient, with rescue boats available all along
	2.02	the course, held in daylight only (refer to Appendix C). Incident Reporting
**	2.02	The <i>organising authority</i> of a race will establish whether any incidents occurred, which if
		reported would likely be relevant to evolving the Offshore Special Regulations, the plan
		review process, or in increasing safety. The <i>organising authority</i> will follow any guidelines
		issued by World Sailing concerning incident reporting.
	2.03	Inspection
**		A boat may be inspected at any time. If she fails to comply with the <u>OSR</u> her entry may be
		rejected, or she will be subject to protest.
	2.04	General Requirements
**	2.04.1	All equipment required by <u>OSR</u> shall:
**		a) function properly,
**		b) be regularly checked, cleaned and serviced,
**		c) if it has an expiry date, it will not have exceeded its expiry date whilst racing,
**		d) when not in use be stowed in conditions in which deterioration is minimised,
**		e) be readily accessible, and
**		f) be of a type, size and capacity suitable and adequate for the intended use and size of
		the boat.
**	2.04.2	Heavy items shall be <u>permanently installed</u> or <u>securely fastened</u> .

SECTION 3 – STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT

010110		
Categories		A boat shall be/have:
	3.01	Strength of Build and Rig
**	3.01.1	Properly rigged, fully seaworthy and shall meet the <u>OSR</u> .
**	3.01.2	Equipped with shrouds and at least one forestay that shall remain connected to the mast
		and the boat while racing (not applicable to boats with free-standing masts).
**	3.01.3	The forestay referenced above shall be sized and connected in a way that ensures it is
		capable of withstanding the full sailing loads independent of any headsail luff load capacity.
	3.02	Watertight and Structural Integrity of a Boat
**	3.02.1	Essentially watertight and all openings shall be capable of being immediately secured.
	3.02.11	centreboard or daggerboard trunks and the like shall not open into the interior of a hull
		except via a watertight maintenance <u>hatch</u> with the opening entirely above the waterline .
Mo0,1,2	3.02.2	Structural Inspection – Consult the owner's manual for any instructions for keel bolt
14100,1,2	3.02.2	·
		checking and re-tightening. The following inspection to be conducted by a qualified person
		externally with the boat out of the water. Check that there are no visible stress cracks
		particularly around the keel, hull/keel attachment, hull appendages and other stress points,
		inside the hull, backing plates, bolting arrangements and keel floors. (See Appendix L –
		Model Keel and Rudder Inspection Procedure).
Mo0,1,2	3.02.3	Evidence of a structural inspection in accordance with 3.02.2 within 24 months before the
		start of the race or after a grounding whichever is the later.
Mo3	3.02.4	At a haul-out within 2 years prior to the event, the owner or his/her representative shall
		inspect the integrity of the keel and rudder following the recommendations in Appendix L.
Mo0,1,2,3	3.02.5	Inspection after Grounding – an appropriately qualified person shall conduct an internal
, , ,		and external inspection after each unintentional grounding.
	3.03	Hull Construction Standards (Scantlings)
Mo0,1,2	3.03.1	A monohull with a series date after 2009
Mo0,1,2	0.00.1	a) of less than 24 m (78'-9") \underline{L}_{H} shall have:
Mo0,1,2		i been designed, built and maintained in accordance with the requirements of <u>ISO</u>
14100,1,2		12215 Category A, and
Ma0 1 2		ii a World Sailing/ <u>ISAF</u> building plan review certificate issued from an organisation
Mo0,1,2		· · · · · · · · · · · · · · · · · · ·
		recognised by World Sailing. Plan review certificates can be found at World
		Sailing.
Mo0,1,2		b) of 24 m (78'-9") L _H and greater shall have been designed, built and maintained in
		accordance with the requirements of a Classification Society recognised by World
		Sailing
Mo0,1,2		c) shall have a builder's declaration signed and dated by the builder to confirm the boat
		is built in accordance with the reviewed plans. In cases when a builder no longer
		exists, an organising authority or class rules may accept a signed statement by a
		naval architect or other person familiar with the requirements of above in lieu of the
		builder's declaration, and
Mo0,1,2		d) shall have an additional World Sailing/ <u>ISAF</u> certificate of building plan review in
, ,		accordance with a) or b), and c) above for all significant repairs or modifications to
		the hull, deck, coachroof or appendages .
MoMu0,1,2	3.03.2	A monohull with series date between 1987 and 2010, and all multihulls , shall have
1-101-100,1,2	3.03.2	been designed, built, maintained, modified or repaired in accordance with the requirements
		of:
MaO 1 2		
Mo0,1,2		a) OSR 3.03.1, or
Mo0,1,2		b) the <u>ABS</u> Guide for Building and Classing Offshore Yachts and have on board either an
		ABS certificate of plan approval, or written statements signed by the designer and
		builder confirming that they have respectively designed and built the boat in
		accordance with the <u>ABS</u> Guide, or
MoMu0,1,2		c) the EC Recreational Craft Directive for Category A having obtained the CE mark, or
MoMu0,1,2		d) <u>ISO</u> 12215 Category A, with written statements signed by the designer and builder
		confirming that they have respectively designed and built the boat in accordance with
		the <u>ISO</u> standard, and

SECTION 3 – STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT

<u> 3LC110N 3 - 3</u>	INOCIC	JRAL FEATURES, STABILITY, FIXED EQUIPMENT				
Categories		A boat shall be/have:				
	3.12	Mast Step				
**		The heel of a keel stepped mast <u>securely fastened</u> to the mast step or adjoining structure.				
	3.13	Watertight Bulkheads				
Mo0Mu**	3.13.1	Either a watertight "crash" bulkhead within 15% of $\underline{L}_{\underline{H}}$ from the bow and abaft the forward				
		end of <u>LwL</u> , or <u>permanently installed</u> closed-cell foam buoyancy effectively filling the				
		forward 30% LH of the hull.				
Mo0Mu**	3.13.2	Any required watertight bulkhead to be strongly built to take a full head of water pressure				
		without allowing any leakage into the adjacent compartment.				
Mo0	3.13.3	At least two watertight transverse main bulkheads in addition to any bulkheads positioned				
		within the forward and aft 15% of $\underline{L_H}$.				
Mo0	3.13.4	Outside deck access for inspection and pumping shall be provided to every watertight				
		compartment terminated by a hull section bulkhead, except that deck access to extreme				
		end "crash" compartments is not required.				
Mo0	3.13.5	An access <u>hatch</u> in every required watertight bulkhead (except a "crash" bulkhead). The				
		access <u>hatch</u> shall have means of watertight closure permanently attached to the main				
		panel, or lid, or cover of the <u>hatch</u> . The closure shall not require tools to operate.				
	3.14	Pulpits, Stanchions, Lifelines				
	3.14.1	General				
**		The perimeter of the deck surrounded by system of <u>lifelines</u> and pulpits as follows:				
**		a) continuous <u>lifelines</u> fixed only at (or near) the bow and stern. However, a gate on				
		each side of a boat is permitted. Except at its end fittings and at gates, the movement				
		of a <u>lifeline</u> in a fore-and-aft direction shall not be constrained. Temporary sleeving				
		shall not modify tension in the <u>lifeline</u> ,				
**		b) minimum heights of <u>lifelines</u> and pulpit rails above the working deck and vertical				
		openings:				
**		i upper: 600 mm (24"),				
**		ii intermediate: 230 mm (9"),				
**		iii vertical opening: no greater than 380 mm (15") except that on a boat with a				
		series date before 1993 where it shall be no greater than 560 mm (22"),				
MoMu3,4		iv a boat less than 8.5 m (28') \underline{L}_{H} may use a single <u>lifeline</u> system with a height				
		between 450 mm (18") and 560 mm (22").				
**		c) <u>lifelines</u> permanently supported at intervals of not more than 2.2 m (7'-2 1/2") and				
		not passing outboard of supporting stanchions,				
**		d) pulpit and stanchion bases <u>permanently installed</u> with pulpits and stanchions				
		mechanically retained in their bases,				
**		e) the outside of pulpit and stanchion base tubes no further inboard from the perimeter				
		of the deck than 5% of boat beam or 150 mm (6"), whichever is greater, nor further				
		outboard than the perimeter of the deck, where the perimeter of the deck is defined				
		as the hull and deck intersection at an angle of not more than 15 degrees to the				
		horizontal in a transverse plane when the yacht is upright,				
**		f) stanchions straight and vertical except that:				
**		i within the first 50 mm (2") from the deck, stanchions shall not be displaced				
		horizontally from the point at which they emerge from the deck or stanchion base				
		by more than 10 mm (3/8"),				
**		ii stanchions may be angled to not more than 10° from vertical at any point above				
		50 mm (2") from the deck.				
**		g) a bow pulpit may be open provided the opening between the pulpit and any part of				
		the boat does not exceed 360 mm (14"),				

Categories

A boat shall be/have:

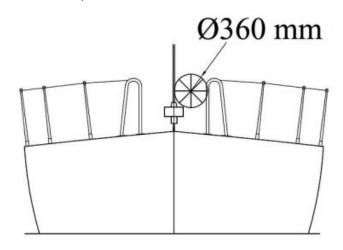

Figure 2 – Diagram Showing Pulpit Opening

- lifelines may terminate at or pass through adequately braced stanchions set inside and overlapping the bow pulpit,
- when a deflecting force of 4 kg (8.8 #) is applied to a lifeline at the mid-point of the i) longest span between supports that are aft of the mast, the deflection shall not exceed:
 - 50 mm (2") for an upper or single lifeline,
 - 120 mm (4 ¾") for an intermediate lifeline.

3.14.2 Special Requirements for Pulpits, Stanchions, Lifelines on Multihulls

When on a boat it is impractical to precisely follow **OSR** regarding pulpits, stanchions, lifelines, the regulations for monohulls shall be followed as closely as possible.

3.14.3 Lifeline Specifications

- a) lifelines of stranded stainless steel wire,
- b) <u>lifelines</u> of either:
 - stranded stainless steel wire, or
 - ii HMPE,
- The minimum diameter is specified in table 4 below, c)
- Stainless steel lifelines shall be uncoated and used without close-fitting sleeving, however, temporary sleeving may be fitted provided it is regularly removed for inspection,
- A lanyard of synthetic rope may be used to secure <u>lifelines</u> provided the gap it closes e) does not exceed 100 mm (4"). This lanyard shall be replaced annually,
- All components of the <u>lifeline</u> enclosure system shall have a breaking strength no less f) than the lifeline,
- When HMPE is used, it shall be protected from chafe and spliced in accordance with the manufacturer's recommended procedures.

Table 4 - Lifeline Diameter Requirements

<u>L</u> H	Wire Min. <u>lifeline</u>	HMPE rope (Single braid)	HMPE Core (Braid on braid)
	diameter	min. <u>lifeline</u> diameter	min. <u>lifeline</u> outside
			diameter
under 8.5 m (28')	3 mm (1/8")	4 mm (5/32")	6 mm (1/4")
8.5m – 13 m	4 mm (5/32")	5 mm (3/16")	7 mm (9/32")
over 13 m (42' 8")	5 mm (3/16")	5 mm (3/16")	7 mm (9/32")

3.15 **Multihull Nets or Trampolines**

3.15.1 General

The words "net" and "trampoline" are interchangeable. A net shall be:

essentially horizontal,

 batteries installed after 2011 shall be of the sealed type from which liquid electrolyte cannot escape, At the start a boat with an electric engine shall carry sufficient capacity to meet electrical requirements for the duration of the race and to motor at the above minimum speed for at least 5 hours. a dedicated engine/generator starting battery when an electric starter is the only method for starting the engine and/or separate generator,
 b) At the start a boat with an electric engine shall carry sufficient capacity to meet electrical requirements for the duration of the race and to motor at the above minimum speed for at least 5 hours. MoMu0,1,2,3 c) a dedicated engine/generator starting battery when an electric starter is the only method for starting the engine and/or separate generator,
electrical requirements for the duration of the race and to motor at the above minimum speed for at least 5 hours. MoMu0,1,2,3 c) a dedicated engine/generator starting battery when an electric starter is the only method for starting the engine and/or separate generator,
MoMu0,1,2,3 c) a dedicated engine/generator starting battery when an electric starter is the only method for starting the engine and/or separate generator,
method for starting the engine and/or separate generator,
Mo1,2,3 3.29.1 A hand-held marine VHF transceiver for each grab bag, watertight or with a waterproof
Mu1,2,3,4 cover. When not in use to be stowed in the grab bag or emergency container (see <u>OSR</u> 4.21).
Mo4 3.29.2 A hand-held marine VHF transceiver, watertight or with a waterproof cover.
MoMu0 3.29.3 At least two (one for each grab bag) hand-held marine VHF transceivers each with min 5 W
output power, watertight or with waterproof covers. When not in use to be stowed in a grab bag (see <u>OSR</u> 4.21).
** 3.29.4 A second radio receiver, which may be the handheld VHF in <u>OSR</u> 3.29.1 above, capable of receiving weather bulletins.
MoMu0,1,2,3 3.29.5 A marine radio transceiver with an emergency antenna when the regular antenna depends
upon the mast.
MoMu0,1,2,3 3.29.6 If the marine radio transceiver is a VHF:
MoMu0,1,2,3 a minimum rated output power of 25 W,
MoMu1,2,3 b) if installed after 2015 be <u>DSC</u> capable,
MoMu0 c) a marine VHF <u>DSC</u> radio covering all international and US marine channels and meeting International Telecommunications Union (ITU) class D.
MoMu0,1,2 d) a masthead antenna not less than 38 cm (15") in length and co-axial feeder cable with not more than 40% power loss,
MoMu3 e) a masthead antenna and co-axial feeder cable with not more than 40% power loss,

SECTION 3 – STRUCTURAL FEATURES, STABILITY, FIXED EQUIPMENT

SECTION 3 - STRUCTURAL FLATURES, STABILITY, FIXED EQUIPMENT					
	A boat shall be/have:				
	<u>DSC</u> capable VHF transceivers shall be programmed with an assigned MMSI (unique to the boat), be connected to a <u>GPS</u> receiver and be capable of making distress alert calls as well as sending and receiving a <u>DSC</u> position report with another <u>DSC</u> equipped station,				
3.29.7	An <u>AIS</u> Transponder which either:				
	a) shares the masthead VHF antenna via a low loss <u>AIS</u> antenna splitter, or				
	has a dedicated AIS antenna not less than 38 cm (15") in length mounted with its base not less than 3 m (10') above the waterline and co-axial feeder cable with not more than 40% power loss.				
	The AIS transponder shall be class A.				
3.29.8	A <u>GPS</u> .				
3.29.9	A hand-held satellite telephone for each grab bag, watertight or with waterproof cover and internal battery. Stow in the grab bag (see <u>OSR</u> 4.21) when not in use.				
3.29.10	least two hand-held satellite telephones (one for each grab bag), watertight or with aterproof covers and internal batteries. When not in use each to be stowed in the grab g (see OSR 4.21),				
3.29.11	direction-finding radio receiver operating on 121.5 MHz to take a bearing on a <u>PLB</u> or <u>PIRB</u> , or an alternative device for crew overboard location when each <u>crewmember</u> has an oppropriate personal unit (see <u>OSR</u> 4.22.1).				
3.29.12	satellite device able to send and receive data and a tracking device shall be <u>permanently</u> <u>istalled</u> and permanently powered up for the duration of the race and for which the race permittee shall have polling authority.				
3.29.13	An MF/HF marine SSB transceiver (<u>GMDSS/DSC</u>) with at least 125 W transmitter power and frequency range from at least 1.6 to 29.9 MHz with <u>permanently installed</u> antenna and earth.				
3.29.14	An active radar set <u>permanently installed</u> either:				
	a) a pulse (magnetron) unit with not less than 4 kW PEP and an antenna unit with a maximum dimension not less than 533 mm, or				
	b) a frequency modulated continuous wave (FMCW) Broadband Radar™ unit. The radar antenna unit shall remain essentially horizontal when the boat is heeled and at least 7 m (23') above the water. Installations in place before January 2006 shall comply as closely as possible with <u>OSR</u> 3.29.13 a).				
	3.29.7 3.29.8 3.29.9 3.29.10 3.29.11 3.29.12				

SECTION 4 – PORTABLE EQUIPMENT

_		4 – PC	DRIABLE EQUIPMENT			
C	ategories		A boat shall have:			
		4.01	Sail Letters & Numbers			
*	*	4.01.1	Identification on sails which complies with RRS 77 and RRS Appendix G.			
M	loMu0,1,2,3	4.01.2	An alternative means of displaying identification as required under RRS Appendix G for			
			mainsail, to be displayed when none of the numbered sails are set.			
		4.02	Search and Rescue Visibility			
M	loMu0	4.02.1	A 4 m ² (43 ft ²) area of highly visible pink, orange or yellow on the coachroof and/or deck.			
M	lo1Mu1,2	4.02.2	A 1 m ² (11 ft ²) solid area of highly visible pink, orange or yellow capable of being			
			displayed on the coachroof and/or deck.			
M	lu0,1,2,3,4	4.02.3	A 1 m ² (11 ft ²) area of highly visible pink, orange or yellow showing when the boat is			
			inverted.			
		4.03	Soft Wood Plugs			
*	*		A tapered soft wood plug stowed adjacent to every through-hull opening.			
		4.04	Jackstays and Clipping Points			
M	loMu0,1,2,3	4.04.1	Permanently Installed fittings for jackstay ends and clipping points.			
M	loMu0,1,2,3	4.04.2	Jackstays which shall:			
M	loMu0,1,2,3		a) be independent on each side of the deck,			
M	loMu0,1,2,3		b) enable a <u>crewmember</u> to move readily between the working areas on deck and the			
			cockpit(s) with the minimum of clipping and unclipping operations,			
M	loMu0,1,2,3		c) have a breaking strength of 2040 kg (4500#) and be uncoated and non-sleeved			
			stainless steel 1 x 19 wire of minimum diameter 5 mm (3/16"), webbing or HMPE			
			rope.			
M	loMu0,1,2,3	4.04.3	Clipping points which shall:			
M	loMu0,1,2,3		a) be adjacent to stations such as the helm, sheet winches and masts, where			
			<u>crewmembers</u> work,			
M	loMu0,1,2,3		b) enable a <u>crewmember</u> to clip on before coming on deck and unclip after going below,			
	loMu0,1,2,3		c) enable two-thirds of the crew to be simultaneously clipped on without depending on			
	, , ,		jackstays,			
M	lu0,1,2,3		d) on a trimaran with a rudder on the outrigger, permit a <u>crewmember</u> to repair the			
			steering mechanism whilst attached to a clipping point.			
		4.05	Fire Fighting Equipment			
*	*	4.05.1	A fire blanket adjacent to every cooking device.			
M	loMu1,2,3	4.05.2	2 fire extinguishers, each with 2 kg of dry powder or equivalent, in different parts of the			
			boat.			
M	loMu4	4.05.3	2 fire extinguishers in different parts of the boat.			
M	loMu0	4.05.4	3 fire extinguishers, each with 2 kg of dry powder or equivalent, in different parts of the			
			boat, one system of which is to deal with fire in a machinery space.			
		4.06	Anchors			
M	loMu1,2,3	4.06.1	2 un-modified anchors that meet the anchor manufacturer's recommendation based on the			
	, ,		boat's dimensions with suitable combination of chain and rope, ready for immediate			
			assembly, and ready for deployment within 5 minutes except that for a boat less than 8.5			
			m (28') \underline{L}_{H} there shall be 1 anchor meeting the same criteria.			
M	loMu4	4.06.2	1 un-modified anchor that meets the anchor manufacturer's recommendation based on the			
			boat's dimensions with suitable combination of chain and rope, ready for immediate			
			assembly, and ready for deployment within 5 minutes.			
M	loMu0	4.06.3	Anchors, chain and rope which comply with relevant class rules or the rules of a recognised			
			Classification Society.			
		4.07	Flashlights and Searchlights			
M	lo0,1,2,3		Watertight lights (minimum IP67 rated) with spare batteries and bulbs as follows, or a			
	lu**		watertight (minimum IP67 rated) rechargeable LED torch, of at least 400 Lumens.			
	loMu0,1,2,3		a) a searchlight, suitable for searching for a person overboard at night and for collision			
	, , -,-		avoidance,			
M	lo0,1,2,3		b) stowed in each grab bag (see OSR 4.21), a flashlight in addition to OSR 4.07 a).			
	lu**					
		_				

SECTION 4 – PORTABLE EQUIPMENT

		LE EQUIPMENT			
Categories		A boat shall have:			
Mo0,1,2,3		c) the flashlight in <u>OSR</u> 4.07 b) shall be stowed in the grab bag (see <u>OSR 4.21</u>).			
Mu**					
MoMu0		d) a high-intensity heavy duty searchlight powered by the boat's batteries, instantly			
		available for use on deck and in the cockpit.			
	4.08	First Aid Manual and First Aid Kit			
**		A First Aid Manual and First Aid Kit. The contents and storage of the First Aid Kit shall			
		reflect the likely conditions and duration of the passage, and the number of <u>crewmembers</u> .			
	4.09	Foghorn			
**	1100	A foghorn.			
	4.10	Radar Reflector			
**	4.10.1	A passive radar reflector with:			
**		a) octahedral circular plates of minimum diameter 30 cm (12"),			
**		b) octahedral rectangular plates of minimum diagonal dimension 40 cm (16"), or			
**		c) a non-octahedral reflector with a documented root mean square minimum Radar			
		Cross Section (RCS) area of 2 m^2 (22 ft^2) from 0–360° of azimuth and ± 20 ° of heel.			
MoMu0	4.10.2	A Radar Target Enhancer (RTE) which complies with <u>ISO</u> 8729-2:2009 or equivalent.			
เกเบเกนบ	4.10.2 4.11	Navigation Equipment			
MoMu() 1 2 2	4.11.1	Navigational charts (not solely electronic), light list and chart plotting equipment.			
MoMu0,1,2,3 MoMu4					
MOMU4	4.11.2	Navigational charts light list, and chart plotting equipment. If electronic-only, an			
	4.42	independent alternative shall be on board.			
**	4.12	Safety Equipment Location Chart			
*		A safety equipment location diagram in durable waterproof material, clearly displayed in			
		the main accommodation, marked with the location of principal items of safety equipment.			
	4.13	Depth, Speed and Distance Instruments			
MoMu0,1,2,3	4.13.1	A knotmeter or distance measuring instrument (log).			
MoMu1,2,3,4	4.13.2	A depth sounder.			
MoMu0	4.13.3	Two independent depth sounders.			
	4.14	Spare Number			
	4.15	Emergency Steering			
MoMu0,1,2,3	4.15.1	An emergency tiller capable of being fitted to the rudder stock except when:			
MoMu0,1,2,3		a) the principal method of steering is by means of an unbreakable metal tiller,			
MoMu0,1,2,3		b) there are two methods (e.g. tillers, wheels) of controlling a rudder, neither of which			
		shares components with the other except for the rudder stock.			
MoMu0,1,2,3	4.15.2	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled.			
	4.16	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts			
**	4.16 4.16.1	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts Tools and spare parts, suitable for the duration and nature of the passage.			
	4.16 4.16.1 4.16.2	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts Tools and spare parts, suitable for the duration and nature of the passage. An effective means to quickly disconnect or sever the standing rigging from the boat.			
**	4.16 4.16.1	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts Tools and spare parts, suitable for the duration and nature of the passage. An effective means to quickly disconnect or sever the standing rigging from the boat. Boat's Name			
**	4.16 4.16.1 4.16.2	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts Tools and spare parts, suitable for the duration and nature of the passage. An effective means to quickly disconnect or sever the standing rigging from the boat. Boat's Name The boat's name on miscellaneous buoyant equipment, such as lifejackets, cushions,			
**	4.16 4.16.1 4.16.2 4.17	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. Tools and Spare Parts Tools and spare parts, suitable for the duration and nature of the passage. An effective means to quickly disconnect or sever the standing rigging from the boat. Boat's Name The boat's name on miscellaneous buoyant equipment, such as lifejackets, cushions, lifebuoys, recovery slings, grab bags, etc.			
**	4.16 4.16.1 4.16.2	shares components with the other except for the rudder stock. A proven method of emergency steering with the rudder disabled. MoMu0,1,2		iii <u>ISO</u> 9650 valise packed liferafts every 3 years ex- serviced annually,	cept tha	at hire	ed liferaft	s shall be
MoMu0,1,2		iv <u>ISAF</u> liferafts annually,				
MoMu0,1,2		v <u>ORC</u> liferafts annually.				
MoMu0,1,2		b) Servicing certificates (original or a copy) on board.				
M 0 1 2 2	4.21	Grab Bags	(1.2.)	.		
Mo0,1,2,3 Mu**	4.21. <u>1</u>	A grab bag shall have inherent flotation, at least 0.1 m ² (1 (e.g. dayglo yellow or orange) on the outside, shall be mar and shall have a lanyard and clip. If a grab bag has to according to the clearly marked with the identity of its corresponding raf	ked wit	h the	name of	the boat,
MoMu1,2	4.21.2	A grab bag for each liferaft, readily accessible whether or r	not the	boat i	s inverted	d.
MoMu <mark>0</mark>	4.21.3	A grab bag for each liferaft (not required for a spare liferaf accessible whether or not the boat is inverted.	t under	OSR	4.20.1 b)), readily
Mu3,4	4.21 <mark>.4</mark>	The following shall be either stowed with a liferaft, or in a	-	-		
Мо3		grab bag. The container shall be readily accessible whether or not the boat is inverted: The following shall either be stowed with a liferaft or a in grab bag. The grab bag shall be readily accessible whether or not the boat is inverted:				
Mo3Mu3,4		a) 3 hand flares,				
Mo3Mu3,4 Mo3Mu3,4		b) watertight strobe light with spare batteries (may be pc) knife, and	art of t	he flas	shlight),	

_	SECTION 4 – PORTABLE EQUIPMENT							
	Categories		A boat shall have:					
	Mo3Mu3,4		d) whistle.					
		4.22	•					
		4.22.1	Locator Beacons					
	MoMu0,1,2		a) an AIS personal crew overboard beacon for each <u>crewmember</u> ,					
	MoMu0		b) a PLB equipped with 406Mhz and 121.5Mhz for each <u>crewmember</u> ,					
	MoMu0		c) a personal unit in addition to the <u>PLB</u> in <u>OSR</u> 4.22.1 b) if the location device carried by					
			the boat in accordance with OSR 3.29.10 requires it,					
	MoMu0,1,2		Where possible every <u>PLB</u> shall be registered with the appropriate authority associated with					
	1 101 100/1/2		the country code in the hexadecimal identification (15 Hex ID) of the beacon. A beacon can					
			be registered online with the Cospas-Sarsat <u>IBRD</u> if the country does not provide a					
			registration facility and the country has allowed direct registration in the IBRD.					
		4 22 2	GPS Crew Overboard Position					
	MoMu1,2,3	7.22.2	a) For boats with only two <u>crewmembers</u> , a GPS capable of recording a crew overboard					
	11011011,2,5		position, within 10 seconds, and monitoring that position without having to go below					
			deck.					
	MaMu1 2							
	MoMu1,2		b) a <u>GPS</u> capable of recording a crew overboard position within 10 seconds and					
	MaMuO		monitoring that position.					
	MoMu0		c) a <u>GPS</u> capable of recording a crew overboard position within 10 seconds and					
	MaMuO		monitoring that position, and					
	MoMu0		d) connected to an emergency button immediately accessible to a helmsman which will					
			sound an audible alarm in the accommodation and simultaneously send an					
		4 22 2	appropriate signal to the <u>GPS</u> .					
		4.22.3	Lifebuoys					
	MoMu3,4		a) a lifebuoy with a self-igniting light, a whistle, and a drogue within reach of the					
	MaMuO 1 2		helmsman and ready for immediate use,					
, , , , , , , , , , , , , , , , , , , ,								
			· · · · · · · · · · · · · · · · · · ·					
	M-M-0 1 2		immediate use, a second lifebuoy equipped with:					
	MoMu0,1,2		i a whistle, a drogue, a self-igniting light, and					
	MoMu0,1,2		ii a pole and flag. The pole shall be either permanently extended or be capable of					
	M - M - O		being fully automatically extended,					
	MoMu0		iii each lifebuoy shall be equipped with a sachet of fluorescein dye.					
	MoMu0,1,2 **		d) at least one lifebuoy shall depend entirely on permanent buoyancy (e.g. foam),					
	*		e) each inflatable lifebuoy and any automatic device shall be tested and serviced at					
		4 00 4	intervals in accordance with its manufacturer's instructions.					
		4.22.4	Heaving Line					
	**		A heaving line, no less than 6 mm (1/4") diameter, 15–25 m (50–75') long, readily					
		4 22 5	accessible to cockpit.					
		4.22.5	Recovery Sling					
MoMu0,1,2,3 A recovery sling which includes a:								
	MoMu0,1,2,3							
	MoMu0,1,2,3		b) buoyancy section (horseshoe) with no less than 90 N (20#) buoyancy,					
	MoMu0,1,2,3	4 22	c) minimum strength capable to hoist a <u>crewmember</u> aboard.					
** Pyrotechnic and Light Signals Pyrotechnic signals shall be provided conforming to LSA Code Chapter and not older than the stamped expiry date (if any) or if no expiry date than 4 years.								
			· · · · · · · · · · · · · · · · · · ·					
	ale ale		than 4 years:					
	**		a) 2 orange smoke <u>LSA</u> III 3.3,					
	MoMu0,1,2,3	4.3.4	b) 4 red hand flares <u>LSA</u> III 3.2.					
		4.24	Spare Number					
		4.25	Cockpit Knife					
	**		A strong, sharp knife, in a securely restrained sheath shall be readily accessible from the					
			deck or a cockpit.					

SECTION 4 – PORTABLE EQUIPMENT

Categories		A boat shall have:			
	4.26	Storm & Heavy Weather Sail Inventory			
**		the following storm & heavy weather sails (or rotating wing mast if suitable) as specified in			
	<u>OSR</u> 4.27:				
MoMu0	4.26.1	a storm trysail,			
MoMu0,1,2,3	4.26.2	For mainsails manufactured after 1 June 2024			
MoMu <mark>0,1,2</mark>	4.26.3	A storm trysail			
MoMu1		a) Mainsail reefing to reduce the luff by at least 50%.			
MoMu2,3		b) Mainsail reefing to reduce the luff by at least 40%.			
MoMu1,2	4.26.4	either a trysail or mainsail reefing to reduce the luff by at least 50%,			
MoMu3	4.26.5	either a trysail or mainsail reefing to reduce the luff by at least 40%,			
MoMu4	4.26.6	either mainsail reefing to reduce the luff by 12.5% or a heavy weather jib,			
MoMu0,1,2,3	4.26.7	heavy weather jib,			
MoMu0,1,2	4.26.8	storm jib.			

4.27 Storm & Heavy Weather Sail Specifications

Where required by <u>OSR</u> 4.26, the specifications of heavy weather sails shall follow:

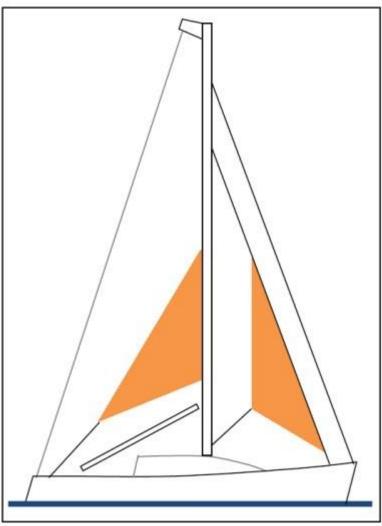

Figure 3 — Storm Sails

4.27.1 Design

- a) the material of the body of a storm sail purchased after 2013 shall have a highly visible colour (e.g. dayglo pink, orange or yellow),
- b) aromatic polyamides, carbon and similar fibres shall not be used in a trysail or storm jib, but <u>HMPE</u> and similar materials are permitted,
- c) sheeting positions on deck for each storm and heavy-weather sail,
- d) sheeting positions for the trysail independent of the boom, and
- e) the maximum area of storm and heavy weather sails shall be lesser of the areas below or as specified by the boat designer or sailmaker.

SECTION 4 – PORTABLE EQUIPMENT

SECTION 4 - FORTABLE EQUIPMENT					
	A boat shall have:				
4.27.2 A Storm Trysail with:					
MoMu0,1,2,3 a) area not greater than 17.5% mainsail hoist (P) x mainsail foot I MoMu0,1,2,3 b) for sails made after 2011: The storm trysail area calculated as (
	b) for sails made after 2011: The storm trysail area calculated as (0.5 x leech length x				
	shortest distance between tack point and leech),				
	c) no headboard,				
	d) no battens,				
	e) sail number and letters on both sides, as large as practicable, and				
	f) in the case of a boat with an in-mast furling mainsail, the storm trysail shall be				
	capable of being set while the mainsail is furled.				
4.27.3	A Heavy Weather Jib (or Heavy Weather Sail in a Boat with no Forestay) with:				
	a) area, in unreefed condition, of 13.5% height of the foretriangle squared, and				
	b) readily available method, independent of a luff groove, to attach to the stay.				
	For sails made after 2011: Storm and heavy weather jib areas calculated as: (0.255 x luff				
	length x (luff perpendicular $+ 2 x$ half width)).				
4.27.4	A Storm Jib with:				
MoMu0,1,2 a) area of 5% (height of the foretriangle) squared,					
	b) maximum luff length 65% of height of the foretriangle , and				
	c) permanently attached method, independent of a luff groove, to attach to the stay.				
	For sails made after 2011: Storm and heavy weather jib areas calculated as: (0.255 x luff				
	length x (luff perpendicular $+ 2 x$ half width)).				
4.28	Drogue, Sea Anchor				
	A drogue for deployment over the stern, or a sea anchor or parachute anchor for				
	deployment at the bow, complete with all necessary gear (see Appendix K).				
 4.29 Deck Bags Mo0 4.29 If permitted by the Notice of Race, Sailing Instructions or Class Rules, bags for 					
4.29	If permitted by the Notice of Race, Sailing Instructions or Class Rules, bags for storing sa				
on deck shall be:					
	a) so constructed to ensure rapid draining of water, and				
	b) <u>securely fastened</u> in such a way that the integrity of deck fittings e.g. stanchior				
<u>lifelines</u> , is not compromised.					
4.30 Emergency Pumps,					
Mo0,1,2 either fixed or portable pump to remove ingress water from any compartment. Th					
shall:					
Mo0,1,2 a) have a minimum rated capacity of 200 l/min (3200 US gph),					
	b) be operated by battery, main engine powered or a separate engine,				
	c) if portable electric-powered, power cables to be terminated with alligator clips, and				
	d) have sufficient hose to discharge directly overboard or into the cockpit.				
Mo0,1,2 A combination of <u>permanently installed</u> and portable pumps may be combined to me					
	above requirement.				
	4.27.3 4.27.4 4.28 4.29				

SECTION 5 – PERSONAL EQUIPMENT

Categories	Categories Each <u>crewmember</u> shall have:					
categories	5.01	Lifejacket				
**	5.01.1					
**	5.01.1	a) i if manufactured before 2012 comply with <u>ISO</u> 12402-3 (Level 150) or equivalent,				
		including EN 396 or UL 1180 and:				
**		 if inflatable have a gas inflation system 				
**		have crotch/thigh straps (ride up prevention system)				
MoMu0,1,2		 have an integral safety harness in compliance with OSR 5.02 				
**		ii if manufactured after 2011 comply with <u>ISO</u> 12402-3 (Level 150) and be fitted				
		with a whistle, lifting loop, reflective material automatic/manual gas inflation				
		system:				
**		 crotch/thigh straps (ride up prevention system) 				
MoMu0,1,2		 an integral safety harness in compliance with <u>OSR</u> 5.02 				
MoMu0,1,2,3		b) have an emergency position indicating light in accordance with either <u>ISO</u> 12402-8 or				
		<u>LSA</u> code 2.2.3,				
**		c) be clearly marked with the boat's or wearer's name,				
MoMu0,1,2,3		d) have a sprayhood in accordance with <u>ISO</u> 12402-8,				
MoMu0		e) have a <u>PLB</u> (as with other types of <u>EPIRB</u> , should be properly registered with the				
		appropriate authority),				
**		f) if inflatable, be regularly checked for air retention.				
MoMu0,1,2,3	5.01.2	A boat shall carry at least one gas inflatable lifejacket spare cylinder and, if appropriate,				
	5.01.3	spare activation head for each type of lifejacket on board.				
MoMu0,1,2	A boat shall carry at least one spare lifejacket as required in <u>OSR</u> 5.01.1, (a spare <u>PLB</u>					
**	E 01 4	described in OSR 5.01.1 e) is not required).				
	5.01.4 The <i>person in charge</i> shall personally check each lifejacket at least once ann5.02 Safety Harness and Tethers					
MoMu0,1,2,3	5.02.1	A harness that complies with <u>ISO</u> 12401 or equivalent.				
MoMu0,1,2,3	5.02.2	A <u>tether</u> that shall:				
MoMu0,1,2,3	0.02.2	a) comply with <u>ISO</u> 12401 or equivalent,				
MoMu0,1,2,3		b) not exceed 2 m (6'-6") including the length of the hooks,				
MoMu0,1,2,3		c) have self-closing hooks,				
MoMu0,1,2,3		d) have overload indicator flag embedded in the stitching, and				
MoMu0,1,2,3		e) be manufactured after 2000.				
MoMu0,1,2,3	5.02.3	either:				
MoMu0,1,2,3		a) a <u>tether</u> not exceeding 1 m (3'-3") including the length of the hooks, or				
MoMu0,1,2,3		b) an intermediate self-closing hook on a 2 m (6'-6") <u>tether</u> .				
MoMu0	5.02.4	a boat shall carry spare harnesses and <u>tethers</u> as required in <u>OSR</u> 5.02 above sufficient for				
		at least 10% of the <u>crewmembers</u> (minimum one unit).				
MoMu0,1,2,3	· · · · · · · · · · · · · · · · · · ·					
M - M - O	5.03	Personal Location Lights				
MoMu0		Two packs of mini flares or two personal location lights (either <u>SOLAS</u> or strobe): on				
	5.04	attached to, or carried on, the person when on deck at night. Foul Weather Suits				
MoMu0	5.04	A foul weather suit with hood.				
Mondo	5.05	Knife				
MoMu0	A knife, to be worn on the person at all times.					
	5.06 Flashlight					
MoMu0 A buoyant watertight flashlight.						
	5.07					
MoMu0		an immersion suit (attention is drawn to EN ISO 15027-1 constant wear suits, and EN ISO				
		15027-2 abandonment suits and the <u>LSA</u> Code Chapter II, 2,3).				

SECTION 5 - PERSONAL EQUIPMENT

Categories		Each <u>crewmember</u> shall have:
	5.08	Diving Equipment
MoMu0		The boat shall have at least two diving suits each, to cover the entire body, and including gloves, fins, and portable air supplies.

SECTION 6 – TRAINING

SECTION							
Categories	6.01	Training					
MoMu0	6.01.1	Every <u>crewmember</u> including the <i>person in charge</i> shall have undertaken training within					
		the five years before the start of the race in <u>OSR</u> 6.02 Training Topics.					
MoMu1,2	6.01.2	At least 30% but not fewer than two <u>crewmembers</u> , including the <i>person in charge</i> shall					
		have undertaken training within the five years before the start of the race in <u>OSR</u> 6.02					
		Training Topics.					
MoMu3	6.01.3	When there are only two <u>crewmembers</u> , at least one shall have undertaken training within					
		the five years before the start of the race in <u>OSR</u> 6.02 Training Topics.					
MoMu0,1,2	6.01.4	Except as otherwise provided in the Notice of Race, an in-date certificate gained at a World					
		Sailing approved Offshore Personal Survival Training course shall be accepted by an event					
		Organising Authority as evidence of compliance with <u>OSR</u> 6.01. See Appendix G – Model					
		Training Course, for further details.					
MoMu <mark>0,1,2</mark>	6.01.5	A refresher course may be taken to renew a certificate if the refresher course is completed					
		within 2 years of the expiration of the individual's most recent Offshore Personal Survival					
		Course certificate.					
	6.02	Training Topics					
MoMu0,1,2	6.02.1	Giving Assistance to Other Craft					
MoMu0,1,2	6.02.2	Personal Safety Gear, theory and practice					
MoMu0,1,2	6.02.3	Care and Maintenance of Safety Gear					
MoMu0,1,2	6.02.4	Fire Precautions and Firefighting, theory and practical					
MoMu0,1,2	6.02.5	Crew Overboard Prevention and Recovery					
MoMu0,1,2	6.02.6	Hypothermia, Cold Shock and Drowning					
MoMu0,1,2	6.02.7	Crew Health					
MoMu0,1,2		Marine Weather					
MoMu0,1,2	6.02.9	Heavy Weather					
MoMu0,1,2		Storm Sails					
MoMu0,1,2		Damage Control					
MoMu0,1,2		Search and Rescue Organisation					
MoMu0,1,2		Pyrotechnics and Signalling Gear, theory and practical					
MoMu0,1,2		Emergency Communications, theory and practical					
MoMu0,1,2	6.03	Liferafts and Abandon Ship, theory and practical					
	6.04	Spare Number Pouting Training On-Roard					
**	6.04 Routine Training On-Board At least annually the crews shall practice the drills for:						
**		a) crew-overboard recovery, and					
**		b) abandonment of vessel.					
	6.05	Medical Training					
MoMu0	6.05.1						
1 101 100	0.03.1	certificate or equivalent.					
MoMu0	6.05.2	In addition to <u>OSR</u> 6.05.1 another <u>crewmember</u> shall have a valid first aid certificate					
1 101 100	0.00.2	completed within the last five years meeting:					
MoMu1		At least two <u>crewmembers</u> shall have a valid first aid certificate completed within the last					
		five years meeting:					
MoMu2		At least one <u>crewmember</u> shall be familiar with first aid procedures, hypothermia,					
		drowning, cardio-pulmonary resuscitation and relevant communications systems, and in					
		addition, one other <u>crewmember</u> shall have a valid first aid certificate completed within the					
		last five years meeting:					
MoMu0,1,2		a) A certificate listed on the <u>WS</u> website <u>https://www.sailing.org/inside-world-</u>					
, ,		sailing/activities-services/technical-offshore/technical-services/technical-and-offshore-					
		safety/offshore-safety/osr-recognised-first-aid-qualifications/ of MNA recognised					
		courses, or					
MoMu0,1,2		b) <u>STCW</u> First Aid Training complying with A-VI/1-3 - Elementary First Aid or higher					
		STCW level.					

SECTION 6 - TRAINING

Categories		
MoMu3,4	6.05.3	At least two <u>crewmembers</u> shall be familiar with First Aid procedures, hypothermia, drowning, cardio-pulmonary resuscitation, and relevant communications systems.
	6.06	Diving Training
MoMu0		At least 30% of the crew shall have received diving training to enable them to carry out basic repairs underwater and to assist recovering a crew overboard.

APPENDIX A – Moveable and Variable Ballast

Notwithstanding the maximum length limit of 24m in the standard, this Appendix invokes International Standard ISO 12217-2, Small craft – Stability and buoyancy assessment and categorization – Part 2: Sailing boats of hull length greater than or equal to 6m. The functions KFR (Knockdown Recovery Factor) and FIR (Inversion Recovery Factor) are defined in ISO 12217-2, except as modified by this Appendix.

This Appendix applies to Monohull boats only. Unless specifically stated, a requirement applies to Special Regulations Categories 0, 1, 2, 3 and 4.

A Stability

A.1 Boat Condition

In the calculation of stability data:

- (a) Deck and other enclosed volume above the sheerline and cockpit volume shall be taken into account.
- (b) Mass shall be taken as Minimum Operating Mass as defined by ISO 12217-2, paragraph 3.5.3.

A.2 General Standards

In the assessment of ISO category for boats fitted with moveable and/or variable ballast, ISO 12217-2, paragraph 6.1.4 b) shall not apply. Boats shall comply with paragraphs 6.2.3, 6.3.1 and 6.4. Calculations shall be for the ballast condition that results in the most adverse result when considering each individual stability requirement. ISO 12217-2 Annex C, paragraph C.3.3, first sentence, the word 'may' is replaced with 'shall'. ISO 12217-2 Annex C, paragraph C.3.4 shall not be used in the calculation of righting lever.

A.3 Knockdown Recovery

Boats with moveable/variable ballast shall comply with the following minimum values of Knockdown Recovery Factor (FKR) calculated in accordance with ISO 12217-2 paragraph 6.4.4 with the modification that the reference to ISO 8666 paragraph 5.5.2 changed to incorporate actual mainsail area and centre of effort. The lesser of FKR₉₀ and FKR₋₉₀ shall be used:

Race Category	0	1,2	3	4
FKR	1.0	0.9	0.8	0.7

Boats with **series date** prior to November 2004 may seek dispensation from this section 1.3 by application to World Sailing.

A.4 Capsize Recovery

For boats racing under Offshore Special Regulations Category 0, regulation 3.04.3 is modified to read:

3.04.3 Either with, or without, reasonable intervention from the crew, a boat shall be capable of self-righting from an inverted position. Self-righting shall be achievable whether or not the rig is intact. Boats with moveable/variable ballast shall comply with this requirement in flat water using manual power only and shall demonstrate that any equipment to be used in re-righting

the boat is ready for use at all times and will function and is useable by the crew with the boat inverted. Re-righting the boat shall not require flooding any part of the boat.

Boats with moveable/variable ballast shall comply with the following minimum values of Inversion Recovery Factor (FIR) calculated in accordance with ISO 12217-2:

Offshore Category 0 FIR 0.9

Boats with **series date** prior to November 2004 may seek dispensation from this section 1.4 by application to World Sailing.

APPENDIX B – Special Regulations for Inshore Racing

Special Regulations for inshore racing are intended for use in short races, close to shore in relatively warm and protected waters where adequate shelter and/or effective rescue is available all along the course, held in daylight only.

Part A Basic

Regulation Item

1.02 Responsibility of Person in Charge

1.02.1 Under <u>RRS</u> 3 the responsibility for a boat's decision to participate in a race or continue racing is hers alone. The safety of a boat and her crew is the sole and inescapable responsibility of the *person in charge* who shall do his best to ensure that the boat is fully found, thoroughly seaworthy and manned by an experienced and appropriately trained crew who are physically fit to face all weather. The *person in charge* shall also assign a person to take over his responsibilities in the event of his incapacitation.

2.04.1 All equipment required by OSR shall:

- a) function properly,
- b) be regularly checked, cleaned and serviced,
- c) if it has an expiry date, it will not have exceeded its expiry date whilst racing,
- d) when not in use be stowed in conditions in which deterioration is minimised,
- e) be readily accessible, and
- f) be of a type, size and capacity suitable and adequate for the intended use and size of the boat.

3.02 Watertight and Structural Integrity of a Boat

3.02.1 A boat shall be essentially watertight and all openings shall be capable of being immediately secured. Centreboard or daggerboard trunks and the like shall not open into the interior of a hull except via a watertight maintenance <u>hatch</u> with the opening entirely above the <u>waterline</u>.

Part B Portable Equipment

A boat shall have:

Regulation Item

- 3.23 A strong bucket with a lanyard and of at least 9 L (2.4 US Gal) capacity.
- 3.24 A compass (a hand-held is acceptable).
- 4.05 A fire extinguisher required if electrical system, engine or stove on board.
- 4.06 An anchor.
- 4.22.3 A lifebuoy with a drogue.

- 4.22.4 A heaving line, no less than 6 mm (1/4") diameter, 15–25 m (50–75') long, readily accessible to cockpit.
- 4.25 A strong, sharp knife, in a securely restrained sheath shall be readily accessible from the deck or a cockpit.

Each Crewmember shall have:

Regulation Item

- 5.01.1 A personal flotation device which shall:
 - a) be equipped with a whistle,
 - b) be clearly marked with the boat's or wearer's name,
 - c) if inflatable, regularly checked for air retention.

Unless otherwise specified by a boat's applicable class rules or by sailing instructions, personal flotation devices shall have at least 150N buoyancy, arranged to securely suspend an unconscious person face upwards at approximately 45 degrees to the water surface.

APPENDIX C – Special Regulations for Inshore Dinghy Racing

Special Regulations for inshore dinghy racing are intended for use in races where:

- boats may not be self-sufficient,
- the races are short in duration and close to a shore base, in relatively warm and protected waters, in daylight and good visibility,
- boats can be observed by the Organising Authority at all times,
- safety/rescue vessels are available all along the course sufficient to enable any competitor to be returned to the shore base in a timely manner, and
- safety/rescue vessels are of a suitable design and properly equipped and are manned by adequately trained and competent personnel including, for each race, at least one skilled in first aid.

Part A Basic

The Notice of Race, Sailing Instructions and class rules will take precedence over these regulations.

All required equipment shall:

- function properly,
- be regularly checked, cleaned and serviced,
- when not in use be stowed in conditions in which deterioration is minimised,
- be readily accessible, and
- be of a type, size and capacity suitable and adequate for the intended use and size of the boat.

Part B Equipment

A boat shall be fitted with:

a strong point for the attachment of a tow and/or anchor line.

A boat shall carry:

- a personal flotation device (PFD) for each person aboard to ISO 12402-5 Level 50 or equivalent,
- a knife,
- if the hull is not self-draining or is able to carry more than 150 litres of free water, a bucket or bailer of not less than 1 litre capacity,
- if a trapeze harness is carried it shall be to ISO 10862, and
- a paddle or means of propelling the boat when not under sail.

APPENDIX D – Guide to ISO and Other Standards

Application and Development Policy

The Special Regulations Sub-Committee reviews changes to international standards and will, when practicable, defer to those standards. Significant changes will, when possible, affect new boats and/or new equipment only. A summary of organisations, using their commonly accepted acronyms, follows.

ISO

ISO, the International Organization for Standardization is a world-wide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO Technical Committees. Each member body interested in a subject for which a Technical Committee has been established has the right to be represented on that committee. International organisations governmental and non-governmental, including e.g. World Sailing, take part in the work. Copies of International Standards may be obtained from a national standards body.

The following International Standards (or Draft Standards), are mentioned in the Offshore Special Regulations:

ISO Standard	Subject	Special Regulation	
8729-2	Marine radar reflectors	4.10	
9650	Liferafts	4.20	
11812	Watertight & quick draining cockpits	3.08	
12401	Deck safety harness	5.02	
12402	Personal Flotation Devices	5.01, Appendix C	
12215	Hull construction standards	3.03	
12217-2	Assessment of stability and buoyancy	3.04.4, Appendix A	
15027-1	Constant wear suit	5.07	
15027-2	Abandonment suit	5.07	
17339	Sea anchors	Appendix K	

CEN

CEN standards (Norms) are developed in Europe by CEN (European Committee for Standardization – Committée Européen de Normalisation) which publishes ENs (European Norms) and which works closely with ISO. The following Norms are mentioned in the Offshore Special Regulations:

EN standard	Subject	Special Regulation
396	Lifejackets	5.01

ABS

ABS Guide for Building and Classing Offshore Yachts. This Guide to scantlings (construction standards) was originally published by ABS (American Bureau of Shipping) in co-operation with the Offshore Racing Council.

RCD

The RCD (Recreational Craft Directive) is published with the authority of the European Union under which "notified bodies" may approve construction standards of boats which may then be entitled to display a CE mark permitting sale in the European Union (see OSR 3.03).

SOLAS

The SOLAS (Safety of Life at Sea) Convention is published by IMO (International Maritime Organization) at which World Sailing has Consultative Status. SOLAS Chapter III, Regulation 3, 10 refers to the LSA (Life Saving Appliances) Code (published as a separate booklet) to which OSR makes the following references:

LSA Code	Subject	Special Regulation
Chapter III, 3.1	Flares (pyrotechnics)	4.20.2
Chapter III, 3.2	Flares (pyrotechnics)	4.20.2, 4.23
Chapter III, 3.3	Flares (pyrotechnics)	4.23
Chapter II, 2.2.3	Lifejacket lights	5.01
Chapter IV, 4	Liferafts	4.20.2
Chapter II, 2.3	Immersion suits	5.07
Chapter III, 2.5	Thermal protective aids	4.20.2

APPENDIX E — World Sailing Code for the Organisation of Oceanic Races

An Oceanic Race is defined as any Offshore race over 800 miles.

- **E.1** Organisers of Oceanic Races should consult with the **SAR (Search and Rescue) authorities** through whose areas a race is proposed to pass. Topics to be considered should among others be:
 - mutual responsibilities,
 - resources,
 - satellite communications coverage,
 - position reporting systems,
 - safety equipment on board,
 - lessons learned from recent events,
 - exchange of communication addresses, phone numbers etc.
- **E.2** A **Risk Analysis** should be made, covering topics like:
 - meteorological conditions (icebergs, major currents, fogbanks, eddies etc.),
 - commercial traffic, separation schemes etc.,
 - stability requirements,
 - SAR assets and coverage,
 - piracy and other security matters etc.
- **E.3 Environmental aspects** as wildlife protective zones should be considered.
- **E.4** A **Notice to Mariners** about the race should be produced, usually in cooperation with the organiser's national authorities.
- **E.5** An **Organisation Chart** shall be established with key appointments like the Race Director (when applicable), Chairman of the Race Committee, Principal Race Officer, Safety Officers, Medical Officer, media personnel etc.
- **E.6** The Organising Authority should from the participating boats require:
 - crew lists with names, nationalities, contact details, PLB data and telephone numbers to next of kin,
 - for all boats all data that is registered for radio and data communications like call signs, Maritime Mobile Service Identity (MMSI), EPIRBs etc.,
 - boat details and descriptions (including electronic pictures),
 - owners/Helmsman declaration regarding liability.
- **E.7** A **Race Control Centre** should be organised with Duty Officer 24/7. The watch roster should include relevant means to reinforce the working capacity. It may be appropriate to arrange a training course for the duty officers before the race, including potential incident scenarios. A visit for skippers and navigators to the Race Control Centre may be arranged before the start of major long races, if possible, also to appropriate Maritime Rescue Co-Ordination Centres (MRCC).

At the Race Control Centre, a logbook should be maintained. A format for daily situation reports should be developed. A voice recorder should be available to record radio communications and crisis management.

- **E.8** A **Safety Information Package** about the race, boat descriptions and details (including electronic pictures), safety equipment, radio communication and medical resources, key personnel at the Race Control etc. should be distributed to participating boats as well as the appropriate MRCCs.
- **E.9** A **Crisis Management Group** should be organised with the race committee chair, the safety officer, medical officer and others as relevant. The team should include media and legal representatives from the organising body.
- **E.10** A **Crisis Support Group** with psychologists, medical and clerical personnel should be available for major incidents, both for immediate support to crews and dependants as well as for crew debriefings at later stages. This may be arranged by the Race Committee or the authorities controlling the area.
- **E.11** There may occur incidents that are significant yet not requiring the assistance of rescue authorities. For those the Organising Authority should consider maintaining a network of contacts and resources across the racing area to be able to support with towing, minor medical support, transport of equipment etc.
- **E.12** The organiser shall produce a **Safety Contingency Plan**, including typical series of actions at accidents as derived from the Risk Analysis. One topic to be covered is when and how to contact dependants, sponsors etc. at various stages of lost contact, requests for assistance or emergency calls.
- **E.13** All boats shall be equipped to standards which at least comply with the relevant level of Special Regulations as adopted by World Sailing. Additional requirements may be prescribed, like additional radio and medical equipment.
- **E.14** In accordance with Special Regulations, an adequate number of <u>crewmembers</u> on each boat shall have **Survival Training**. Apart from the basic requirements for World Sailing Personal Survival Course as recommended in Offshore Special Regulations Appendix G, the Organising Authority can also prescribe:
 - what level of sailing together in the actual boat may be required,
 - which practical training shall be performed by the crew, like MOB drills, helicopter evacuations etc.
- **E.15** A **Safety Check** should be performed before the start, it should include:
 - safety equipment,
 - appropriate certificates for radio and satellite communication equipment
 - Check of individual and collective training,
 - endurance capacity and redundancy of capabilities characteristic for oceanic races like water provision, medical training etc.

The full responsibility for safety however always remains with the *person in charge*.

- **E.16** A **Positioning Reporting system** should be available, linked to the official race webpage.
- **E.17 Meteorological services** may be allowed to be downloaded from public meteorological centres or may be centrally provided from the Organising Authority to reduce satcom costs.
- **E.18** Races shall be conducted in compliance with the World Sailing Racing Rules of Sailing and the COLREGS, whenever it is appropriate for these rules and regulations to be applied. Special attention should be given to traffic separation schemes and when to give way to commercial traffic.
- **E.19** An Organising Authority when appropriate should, in addition to supplying the relevant SAR authorities of the event, also supply:
 - a Telemedical Service Assistance Service (TMAS) or inform a TMAS that the organisers have available on demand the following:
 - for each boat:
 - a list of medicines and medical equipment,
 - details of any TMAS or private medical service arranged by the boat.
 - for each <u>crewmember</u>:
 - name and contact details of physician who certified the <u>crewmembers</u> fit for entry (when applicable),
 - name and contact details of the <u>crewmember</u> home physician,
 - methods for gaining quick access to medical records, if necessary,
 - details of first aid and medical training received.

E.20 The **Notice of Race** should include:

- insurance requirements,
- which individual and collective training that is required,
- what meteorological data and forecasts that will be allowed,
- other matters as appropriate.

E.21 The **Sailing Instructions** may include instructions:

- to continuously monitor VHF Channel 16,
- to have the AIS active at all times or to activate the AIS in reduced visibility and passages with extensive commercial traffic,
- for any other safety matters as appropriate.
- **E.22** A **Lessons Learned meeting** about safety issues should be arranged after the race.

APPENDIX F – Standard Inspection Cards

Since the standard inspection cards vary by race category, Appendix F is appended to each extract. Extracts for each offshore race category are available at:

https://www.sailing.org/inside-world-sailing/rules-regulations/offshore-special-regulations/

APPENDIX G – Model Training Course Offshore Personal Safety

With acknowledgements to IMO (International Maritime Organization), Australian Sailing, RYA (Royal Yachting Association) and US Sailing whose publications have been consulted in the preparation of Appendix G. A possible model course follows.

INTRODUCTION

- **Purpose of the model course:** to provide an example of training under World Sailing Offshore Special Regulation Section 6. The model course is not the only means of providing such training. Other courses satisfying the needs of Section 6 may apply to the appropriate MNA for World Sailing Approval (see Introduction paragraph 6). The MNA is vested with the authority to decide which courses meet the requirements and which do not.
- **Use of the model course.** The course should be adjusted to address the experience and knowledge of the trainees. In addition to offshore sailing experience, trainees should be familiar with the topics in OSR Special Regulations 6.02. A trainee with particular, suitably documented skills may be excused from that part of the course, e.g. professional medical knowledge.
- **Presentation.** Particular presentations may need repeating until the instructor is satisfied that the trainees understand each topic.
- **Evaluation.** The final activities on each day are exercises/exams to test the attendees' knowledge. A score of 70% in each of the marked units, plus the instructors' continuous assessments, will provide an overall evaluation.

5 Structure of the model course:

- **Part A** describes the course framework, including suggestions for teaching facilities and equipment.
- **Part B** describes a possible syllabus, including learning objectives. For more detail on a suggested model course, see the website link shown above.
- **Part C** provides a sample outline of lectures and hands-on sessions with suggested timetable, which should be adjusted to ensure trainees achieve proficiency in the required skills.
- **Part D** describes guidelines for an offshore personal survival refresher course.

6 World Sailing Approved Training Courses and Trainee Certification.

6.1.1 The status of "World Sailing Approved" together with authority to use the World Sailing logo may only be awarded to a training course by a World Sailing MNA (Member National Authority), which must be satisfied that the course delivers training as required by OSR Special Regulation Section 6.01 and 6.02.

- 6.1.2 A grant of approved status requires the MNA to ensure the course provider delivers appropriate training and the MNA must remove such approved status if it judges this necessary.
- 6.2.1 It is not necessary for a training course to follow the Appendix G Model Training Course to be approved as in 6.1 above, but the course must deliver the training required by Special Regulation 6.02.
- 6.2.2 An MNA which lacks experience in offshore training or which, for other reasons, needs or desires advice should contact the World Sailing Secretariat – Offshore and Technical Department.
- A sailor holding an in-date "pass" certificate (each has a validity of 5 years) from a World Sailing Approved Offshore Personal Survival Course shall be accepted by an Organising Authority as having complied with the requirements of World Sailing Offshore Special Regulation 6.01 and 6.02.
- "Pass" certificates issued at a World Sailing Approved course shall carry the statement "World Sailing Approved Offshore Personal Survival Course" and may carry the World Sailing logo.
- 6.5 Unless otherwise stated in the Notice of Race, it is not mandatory that a training course for compliance with SR 6.01 and 6.02 is "World Sailing Approved," however this status is encouraged wherever possible.

Part A Framework

Class Size: While the class size for the lecture sections of the curriculum may be larger, the maximum recommended group size for hands-on training is twenty (20) with smaller sub-groups as needed for effective communication of specific lessons.

A2 Instructors should have:

- wide experience with offshore sailing including in severe weather,
- thorough knowledge of the course material and the requirements of the World Sailing Offshore Special Regulations,
- a sound understanding of teaching methods,
- a current World Sailing approved Offshore Personal Survival Course pass certificate,
- experience with liferaft and lifejacket use for in-water training.

A3 Facilities and equipment

- A 3.1 A classroom with desks or tables and chairs should allow movement of the furniture to create a variety of room arrangements. Ideally, extra rooms will allow the class to split into smaller work groups.
- A 3.2 The main room should have equipment suitable for all audio-visual presentations positioned appropriately and wired safely.
- A 3.3 Group rooms should include table, chairs, display board and writing materials for instructors and trainees.

- A 3.4 A warm-water swimming pool, deep enough to float everyone, is most suitable for demonstration/training with lifejackets and liferafts and must include all appropriate safety equipment, personnel and facilities.
- A 3.5 An outdoor location with proper safety equipment, personnel and facilities is required for demonstration and training with pyrotechnics and fire extinguishers.

A4 Reference and Display Material

To be modified appropriately by course providers for their own geographic areas.

A 4.1 For the Instructors to understand and have available to trainees in the classroom:

- World Sailing Offshore Special Regulations,
- World Sailing RRS (The Racing Rules of Sailing),
- COLREGS (International Regulations for Preventing Collisions at Sea),
- appropriate Notices to Mariners,
- appropriate World Sailing MNA Training Book, or, if not available, World Sailing's Guide to
 Offshore Personal Safety or US Sailing's Safety at Sea, Guide to Safety Under Sail and
 Personal Survival.

A 4.2 Recommended further study, books on material such as:

- The Offshore Special Regulations Handbook by Alan Green (Adlard Coles),
- The Grab Bag Book (F & M Howorth, Adlard Coles),
- Instant Weather Forecasting (A Watts, Adlard Coles),
- Heavy Weather Sailing (A Coles & P Bruce, Adlard Coles),
- Essentials of Sea Survival (F Golden and M Tipton, Human Kinetics).

Part B Suggested Course Outline

Introduction: Explanation of assessment required for ISAF/World Sailing certificate; OSR overview (structural design requirements, vessel portable safety equipment, personal safety equipment, training both in formal sessions and on-board practice); Responsibility of the *person in charge* (leadership); Responsibility of each <u>crewmember</u> for his/her own safety as well as the safety of the vessel and other crew (situational awareness); Importance of crew briefings and displayed stowage chart; Safety ethos

Session 1 – Giving Assistance to Other Craft

Learning Objectives: Laws that cover providing assistance; Moral imperative; Responding to a distress call; Assessing whether you can help; Stages of a typical rescue; Types of assistance you can provide; Manoeuvring close to a sinking vessel; Tactics if the other vessel is on fire; Towing and being towed.

Session 2 – Personal Safety Gear, Theory and Practice

Learning Objectives: Life jacket performance factors; Life jacket classification systems; Pros and cons of different inflation systems; Maintaining inflatable life jackets; Using harnesses, tethers, and jack lines/stays; Personal signalling devices.

Session 3 – Care and Maintenance of Safety Gear

Learning Objectives: Pre-departure and under-way inspections; Vessel systems; Safety gear preparation and maintenance; Crew overboard equipment maintenance.

Session 4 – Fire Precautions and Firefighting, theory and practical

Learning Objectives: Common causes of on-board fire; Classes of fires; Fire prevention; LPG (Propane) and alcohol stoves; Extinguisher types and regulations; Firefighting techniques.

Session 5 – Crew Overboard Prevention and Recovery

Learning Objectives: Crew overboard (COB) prevention; Challenges of COB rescue; What a Person in the Water (PIW) can do; Maneuvers to return to the PIW; Dangers of the vessel's proximity to the PIW; Getting the PIW back on board; Using COB beacons to signal for help; Techniques for high-performance, fully crewed boats.

Session 6 – Hypothermia, Cold Shock and Drowning

Learning Objectives: Human thermoregulation; Causes of hypothermia; Phases of cold-water immersion; Survival in cold water; Classifications of cold exposure; Assessment, care, and treatment; Drowning.

Session 7 – Crew Health

Learning Objectives: Crew responsibility; Contagious diseases; Dehydration; Caloric depletion, low blood sugar; Seasickness; Sprains and strains; Wound management, infection; Burns; Sun injury; Head trauma; Heart attack; Shock; Anaphylactic shock.

Session 8 – Marine Weather

Learning Objectives: Global weather systems; Weather maps; Lows; Squalls and thunderstorms; Thermals; Storm avoidance; Weather forecast models and sources; Wave Dynamics – Wave development, Significant Wave Height (SWH) definition, unusual waves, currents, and seamounts, effects of shoaling and lee shores.

Session 9 – Heavy Weather

Learning Objectives: Preparation & evaluation of boat and crew; On-deck safety; Securing the vessel; Preparing the galley; Being a responsible shipmate; Adjusting the plan; Sea state; Heavy weather techniques; Storm tactics; Seeking shelter; After the storm.

Session 10 - Storm Sails

Learning Objectives: Depowering the rig; Reducing sail; Mast support; Reefing the main; Rigging and setting storm headsails and storm trysails.

Session 11 – Damage Control

Learning Objectives: Priorities of damage control; Question of abandoning the boat; Types of damage and breakdowns; Tools and spares; Short-term fixes; Damage control examples; Grounding hazards and consequences.

Session 12 – Search and Rescue Organisation

Learning Objectives: When and how to ask for help; Local Rescue Coordination Center (RCC) organisation and assets; Commercial ships (AMVER); Transferring to a ship; Helicopter evacuation; Meeting the RCC halfway.

Session 13 - Pyrotechnics and Signalling Gear, theory & practical

Learning Objectives: Sound signals; Lights; Visual signals; Pyrotechnic pointers; Deploying flares safely.

Session 14 – Emergency Communications, theory & practical

Learning Objectives: Emergency procedure words; Marine communication options; Making a Mayday call; VHFs and antennas; Know local VHF channels; Digital Selective Calling (DSC) and AIS; GMDSS and why it is important; Crew overboard alarms; Cellular telephone vs VHF; EPIRBs; Single sideband; Satellite data and voice systems.

Session 15 – Liferafts and Abandon Ship, theory & practical

Learning Objectives: Life raft categories; International standards; Valise or canister; Servicing your raft; Emergency packs; Raft storage; Grab or "Ditch" bags; When to launch; Life raft stability; Boarding the raft; Righting after a capsize; Maximizing your chance of survival on-board the raft.

End of each day Evaluations/Exams:

Instructor to facilitate small group discussions of challenging scenarios, which require crucial decision-making, with solutions shared among the entire class and/or administer written exam(s) comprising about 15 minutes of multiple-choice questions, plus 2 short essays/listings with 5 minutes for marking after swapping the papers amongst the class. Overall assessment for the course will be a combination of the discussions/exams plus the instructor's overall assessment during both theory and practical sessions.

Part C Outline Timetable

World Sailing Offshore Special Regulations Appendix G Model Training Course Part B Day 2

Session	OSR	Topic	Theory	Practical	Start	Stop
		Introduction to Hands-On Training	00:15		08:30	08:45
11	6.02.3	Care and Maintenance of Safety Gear, practical		00:30	08:45	09:15
12	6.02.2	Personal Safety Gear, theory & practice	00:30	00:45	09:15	10:30
13	6.02.15	Life Rafts and Abandon Ship, theory & practice	00:30	00:45	10:30	11:45
		Lunch Break, with demonstrations	00:45		11:45	12:30
14	6.02.4	Fire Precautions/Fire Fighting, theory & practice	00:20	00:40	12:30	13:30
15	6.02.14	Emergency Communications, theory & practice	00:20	00:40	13:30	14:30
16	6.02.13	Pyrotechnics & Signalling Gear, theory & practice	00:20	00:40	14:30	15:30
		Lessons Learned, Situational Awareness	00:30		15:30	16:00
		Exam & Wrap-up	00:30		16:00	16:30
		Day 2, total hours including break = 08:00	04:00	04:00		

Part D - Guidelines for an Offshore Personal Survival Refresher Course

For sailors whose certificates have expired, a refresher training course of about 8 hours training may be arranged. It should contain these sessions:

Session 1 (1 hr)	Update on recent changes in Offshore Special Regulations, national relevant documents or any other changes of importance		
Session 2 (1 hr)	Update on new safety equipment		
Session 3 (1 hr)	Update on recent lessons learned from fatal accidents and incidents in offshore races		
Session 4 (1 hr)	Update on national/regional changes in Maritime Search and Rescue organisations, resources, locations etc. as well as in relevant meteorological services		
Session 5 (2 hrs)	In water training with life vests, liferafts, recovery slings etc.		
Session 6 (1½ hrs)	Medical and/or fire-fighting training as appropriate regarding national regulations.		
Session 7 (1/2 hr)	Written exam		

Detailed contents are to be developed by the appropriate Member National Authority. After the course has been passed with accepted written exam, a new certificate for another five-year period may be issued.

APPENDIX H – Medical Training

Model Training Course for an "OSR Compliant First Aid Course"

Part 1 - Introduction

1 General

Below is the framework for a Member National Authority to establish a minimum First Aid training course suitable for offshore racing.

2 Target

The target of this course is to provide the *person in charge* of an offshore racing boat with <u>crewmember(s)</u> that is/are capable of taking care of managing common-injuries and illnesses on board, as well as managing major incidents on board-to take charge to take charge of the immediate medical actions at a major incident on board. Furthermore, to advise the *person in charge* when a request for outside assistance is needed-required, as well as to advise when to retire from the race and proceed to nearest harbour.

3 Use of the model course.

Instructors should have a knowledge of the unique situation of offshore sailing in terms of delivering medical care. It is suggested that instructors be suitably trained and ideally a medical doctor, paramedics or nurse.

For an MNA wanting to establish a course without the specialist knowledge to correctly train and administer instructors it is suggested that they approach a suitable training partner. Training partners could should be accredited under the International Convention on Standards of Training, Certification and Watchkeeping (STCW) STCW training centres or land based first aid training providers who having have personnel with suitable sailing experience but and crucially an understanding of the liability issues. Should an MNA Member National Authority require advise advice please contact the World Sailing Secretariat – Technical and Offshore Department.

- **Evaluation.** The final activities activity of the day should be an examination, which should be used together with instructors' continuous assessments to provide an overall evaluation. The pass mark is to be taken as 70% in each of the marked/evaluated units.
- **Implementation** Detailed requirements are given below. Thorough preparation is the key to successful implementation of the course.
- **6 Literature** (moved to the bottom of the appendix)

Part 2 - Syllabus

The course is planned for at least a full day 8 hours and includes the following sessions.

Session 1 Introduction

- 1.0 Marine medical environment and characteristics
- 1.1 Literature

Session 2 First aid kits for the Special Regulations races categories

- 2.0 Cat 4 contents (recommendations)
- 2.1 Cat 2-3 contents (recommendations)
- 2.2 Cat 1-0 (if relevant)

Session 3 Tele medical communications

- 3.0 Support options (Medical advice services through official bodies)
- 3.1 Radio/Mobile phone options for support
- 3.2 Licences/certificates for VHF/HF radio communications

Session 4 First Aid - The basics

- 4.0 Basic anatomy/physiology
- 4.1 L-ABCDE (Scene safety, Airway and cervical spine control, Breathing, Circulation and bleeding, Disability, Expose and protect from the environment)
- 4.2 Stopping of serious external bleeding

Session 5 Offshore accidents and actions onboard

- 5.0 Typical accidents onboard (wounds, cuts, sprained wrist, dislocations, burns, head injury, etc.)
- 5.1 General illnesses, fatigue, etc
- 5.2 Actions and treatment (pain management, immobilising a joint, avoidance of infection, suturing, etc.)
- 5.3 Helicopter evacuation
- 5.4 Transfer of casualty to rescue vessel

Session 6 Special offshore medical conditions

- 6.0 Seasickness
- 6.1 Hypothermia (Person recovered from sea)
- 6.2 Dehydration
- 6.3 Brain concussion
- 6.4 Keeping the blood sugar level up (what to eat and drink)

Session 7 Cardiac and respiratory arrest

- 7.0 Cardiopulmonary resuscitation (CPR)
- 7.1 Artificial respiration
- 7.2 Use of Defibrillator

Session 8 Systematic Accident management

- 8.0 Damage and causality evaluation
- 8.1 Decisions and actions when to call for outside assistance, when to retire and proceed to nearest harbour
- 8.2 Observation and treatment of patients

Session 9 Psychology Treatment

- 9.0 Human reactions in distress
- 9.1 Treatment of psychological breakdowns
- 9.2 Crisis group management
- 9.3 Debriefing procedures

Session 10 Practical training

- 10.0 CPR
- 10.1 Patient observations and treatment
- 10.2 Radio medical training
- 10.3 Decision making When to call for assistance, when to retire?

Session 11 Examination

11.0 A questionnaire of 25 questions, requirement >70 % correct.

Literature (Previously Part 1 section 6)

The following books for further study are not endorsed by World Sailing but merely are books suitable for background reading:

- Medical Emergency Afloat
- First Aid at Sea (Douglas Justin and Colin Berry, Adlard Coles Nautical, London) ISBN ISBN 9781408105993
- First Aid Afloat (Dr Robert Haworth) ISBN 9780906754887
- Skipper's Medical Emergency Handbook (Author Dr Spike Briggs, Dr Campbell Mackenzie)
 ISBN 9780713689372
- Doctor on Board: A Guide to Dealing with Medical Emergencies (Author Jurgen Hauert)
 ISBN 9781408112724
- Ship Captain's Medical Guide ISBN 978-0115534614
- International Medical Guide for Ships, World Health Organization, Geneva

General First Aid

• First Aid Manual 9th Edition (Author St John's Ambulance Brigade) ISBN 9781405335379

Non-English Publications

- Pan Pan Medico A Bordo (http://www.panpan.it/)
- Le Guide de la medecine a distance, by Docteur J Y Chauve, published by Distance Assistance BP33 F-La Baule, cedex, France. An English translation is being planned.

APPENDIX J – Hypothermia

WHAT IS IT?

A condition in which exposure to cold air and/or water lowers body core temperature. Death may result from the brain and heart being exposed to an extremely low temperature. Death can result from too low a brain and heart temperature.

SYMPTOMS OF HYPOTHERMIA

- The following are warning signs of hypothermia:
- Shivering
- Exhaustion or feeling very tired
- Confusion
- Fumbling hands
- Memory loss
- Slurred speech
- Drowsiness

WHY BE CONCERNED?

Hypothermia, even mild cases, decreases crew efficiency and increases risk of costly accidents. Proper planning against hypothermia can give a winning competitive edge.

PREVENTION

- Wear warm clothing and a lifejacket/harness. Have proper foul-weather kit for all crew.
 Dry suits are excellent. Insulate all areas of the body, especially the high heat-loss areas: head, neck, armpits, sides of chest and groin. Keep warm and dry, but avoid sweating; wear layered clothes.
- Rotate watch frequently.
- Get plenty of rest, prevent fatigue.
- Eat and drink normally, no alcohol.
- Prevent dehydration; watch urine colour (drink more if colour becomes more intense).
- Avoid seasickness.
- Take into account special medical problems of crew members.
- Regularly train crew in Man Crew Overboard recovery.
- Have two or more crew trained in CPR (Cardio-pulmonary Resuscitation).
- Practice donning survival suit (if carried) prior to departure. Know where they are stowed.

SURVIVAL IN COLD WATER (under 75°F, 25°C)

• **If boat is in trouble**, put on dry or survival suits if carried. Radio for help; give position, number of crew, injuries, boat description. Make visual distress signals. Stay below if possible. Remain aboard until sinking is inevitable.

- **If going overboard**, launch life raft and EPIRB (Emergency Position Indicating Radio Beacon). Take grab bag, visual distress signals and waterproof hand-held VHF. Get into raft, stay out of water as water conducts heat out of the body 20 times faster than air. Remain near boat if practicable.
- **If in the water**, crew should stay together near the boat. This makes everyone easier to find, helps morale. Enter life raft, keep dry suit or survival suit on if worn.
- If not wearing dry suit or survival suit, make sure you wear a lifejacket, keep clothes and shoes on for some insulation and flotation. Keep hat on to protect head. Get all or as much of body out of water as soon as possible into raft or swamped boat or onto flotsam. Avoid swimming or treading water, which increases heat loss by hugging knees against chest. If in a group form a circle by putting arms over shoulders of adjacent crew. Minimise exposed body surface. A splashguard accessory on the lifejacket greatly improves resistance to swallowing seawater and also accommodates involuntary "gasping" when plunged into cold water.

WARNING

- First aid for severe and critical hypothermia is to add heat to stabilise temperature only. Rapid re-warming, such as a hot shower or bath, may be fatal; it will, at least, cause complications. Allow body to re-warm itself slowly.
- Body core temperature lags behind skin temperature during re-warming. Keep victim
 protected for extended period after apparent full recovery or medical help arrives. Many
 hours are required for full return to normal temperature even though victim says he has
 recovered.
- Always assume hypothermia is present in all man crew overboard situations in during which victim has been exposed for more than 10–15 minutes.
- Victims may also be suffering from near drowning, thus needing oxygen. Observe for vomiting.
- In a helicopter rescue, protect victim including the head from rotor blast wind chill.

HYPOTHERMIA FIRST AID

ALL CASES

- Keep victim horizontal
- Move victim to dry, warm, and protected area shelter and warmth
- Allow to urinate from horizontal position
- Handle gently
- Remove very wet clothes cut off if necessary
- Apply mild heat (comfortable to your skin) to head, neck, chest and groin use hot water bottles, warm moist towels
- Cover with blankets or sleeping bag; insulate from cold including head and neck
- Report to Doctor by radio

HYPOTHERMIA FIRST AID

MILD CASES

Primary task is to prevent further heat loss and allow body to re-warm itself

- Give warm, sugary sweet drinks no alcohol no caffeine
- Apply mild heat source to stabilise temperature and/or
- Re-heat to point of perspiring
- Keep victim warm and horizontal for several hours

MODERATE CASES

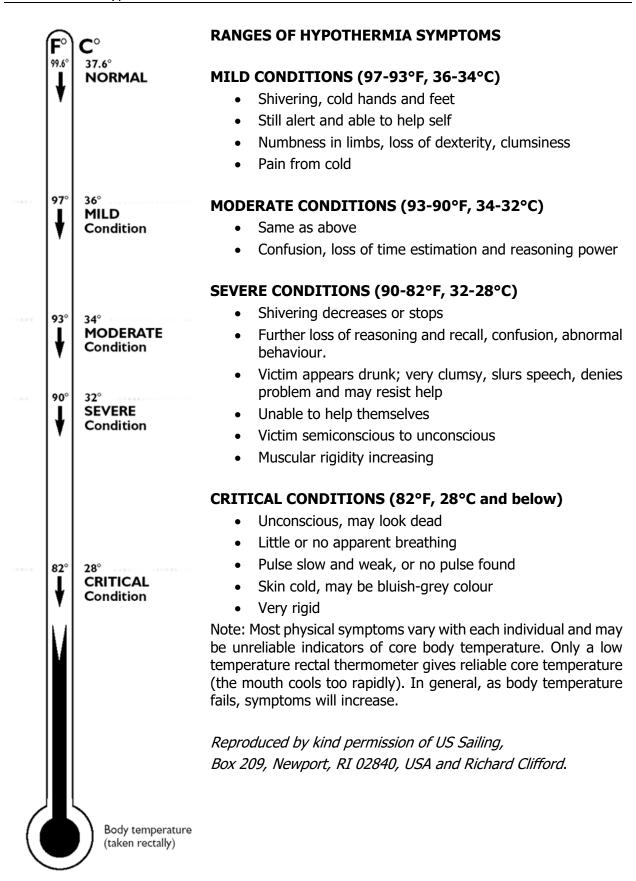

- Same as above
- Offer sips of warm sugary liquid only if victim is fully conscious and able to swallow without difficulty – no alcohol – no caffeine
- Have victim checked by doctor

SEVERE CASES

- Obtain medical advice as soon as possible using your radio
- Assist victim, but avoid jarring him rough handling may cause cardiac arrest or ventricular fibrillation of heart
- No food or drink
- Observe for vomiting and be prepared to clear airway
- Ignore pleas of "Leave me alone, I'm OK" victim is in serious trouble keep continuous watch over victim
- Lay victim down in bunk, wedge in place, elevate feet, keep immobile; no exercise
- Apply external mild heat to head, neck, chest and groin keep temperature from dropping, but avoid too rapid a temperature rise

CRITICAL CASES PATIENTS

- Always assume the patient is revivable hypothermic victims may look dead. Do not give up pulse very difficult to feel, breathing may have stopped.
- Handle with extreme care.
- Tilt the head back to open the airway look, listen and feel for breathing and pulse for one to two full minutes.
- If there is any breathing or pulse, no matter how faint or slow, do not give CPR, but keep a close watch on vital sign changes.
- Stabilise temperature with available heat sources, such as naked chest to back warming by other <u>crewmember</u> (leave legs alone)
- If no breathing or pulse for one or two minutes, begin CPR immediately. Do not give up until victim is thoroughly warm – alive or dead, unless these efforts put the crew in danger or advised by trained medical personnel.
- Medical help imperative hospitalisation needed.

APPENDIX K – Drogues and Sea Anchors

TERMINOLOGY

The term "drogue" generally means a device dragged from the stern of a vessel which continues to make steerage way through the water but at reduced speed. The term "sea anchor" generally means a device streamed from the bows of a vessel practically halted in the water by the action of the sea anchor.

LIFERAFTS

Every liferaft has a sea anchor supplied as part of its equipment. A sea anchor is critical to the safe use of a liferaft and dramatically reduces the chance of liferaft capsize. Its secondary function is to limit drift. A spare sea anchor may be carried in a grab bag. Sea anchors in liferafts should comply with ISO 17339 and the opportunity should be taken at service intervals to ensure this.

DROGUES ON SAILING BOATS

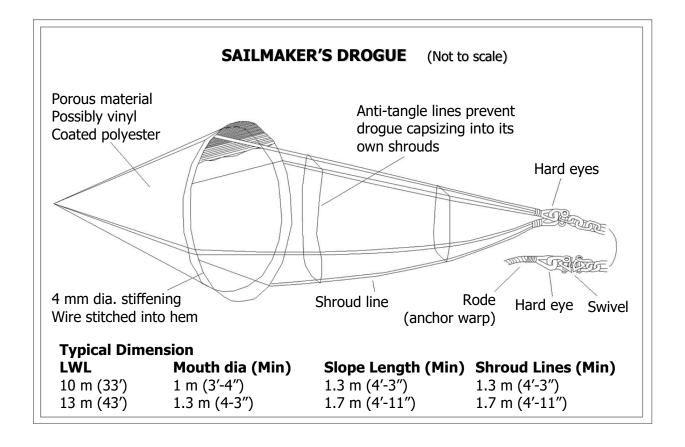

A number of research programmes have been conducted including one for the RORC by the Southampton University Wolfson Unit. In tests drogue deployment repeatedly prevented typical sailing boat forms from being slewed sideways and rolled in heavy breaking seas.

Deployment of a drogue over the stern means that heavy water will break over that part of the sailing boat, so all openings must be properly secured shut.

A "series-drogue" invented by Donald Jordan has the ability to continue to provide drag even if part of the device is "surfing" under a wave crest.

SEA ANCHORS ON SAILING BOATS

The most common form of sea anchor for sailing boats is the "parachute" anchor developed from aviation parachutes. Specialist manufacturers have accumulated much data to demonstrate the effectiveness of the device which can enable a vessel to take seas bows-on, reduce drift to the order of one knot, and resist capsize.

APPENDIX L – Model Keel and Rudder Inspection Procedure

The model form is not the only means of meeting the needs of OSR 3.02.3 Evidence of Periodic Structural Inspection, Organising Authorities may develop on-line forms.

Category 0,1,2 Structural Inspection of a boat shall be completed by a qualified person both internally (may be in the water) and externally (out of the water). The purpose of this inspection is to identify and report to the Owner the condition of the keel and keel structure observed during this inspection. Category 3 inspection: from 1 January 2023 the Owner/representative shall inspect the integrity of the keel and rudder. It is the responsibility of the Owner to undertake any repairs.

Consult the Owners' Manual for the specific boat, steering system and type of keel (e.g. fin, lifting, swinging, full length). Inspect in detail any high-load areas: keel attachment, keel floor, steering systems, rudder(s). Pay special attention to prior repairs, especially following groundings.

Internal Inspection: Check backing plates, bolting arrangements, sump area and keel floors for any signs of cracking, weakening, or de-laminated tabbing. Lead or lead alloy keels may require tightening of bolts to ISO standards due to lead creeping. Inspect keel bolt nuts for corrosion. Check bolt holes for "ovaling." Visually inspect for possible de-bonding of the supporting structure.

External Inspection: Check there are no signs of stress cracks (not gelcoat cracks) around the keel attachments to hull, or movement or opening around the keel/hull interface which may allow water ingress and consequent keel bolt crevice corrosion. If in doubt, sand back bottom paint/gel coat to identify depth of crack. Check keel tip deflection to insure immediate return and no internal concomitant movement in the keel floor. Visually check high stress regions, particularly around the forward and aft hull attachment areas of the keel, for signs of paint or gelcoat cracking or large, deep blisters, which can indicate separation and structural weakness.

Rudder/Steering system: Check bearing area for any damage/stress cracks; check rudder shaft and blade integrity, especially at any shaft joins and at upper connections to hull/deck. Undertake a tip deflection test to identify any excessive movement. If applicable, check rudder straps and gudgeons for corrosion or cracking.

Lifting and swing keels: In addition to above, check there are no significant stress cracks in structure around pins supporting the keel. Check for extensive corrosion on pins, cylinders and supporting metal structure.

APPENDIX M – Optional Wording for Organising Authorities' NoRs or SIs

1. It is recommended that *organising authorities* include the following in their Notice of Race:

Sustainability: Boats built after 2026 shall produce at least 20% of the energy that is used while racing, other than propulsive power from the wind, from renewable energy sources.

- If an organising authority chooses to permit the use of autopilots or to allow competitors to pay for weather data, here are suggested wordings for OAs to consider including in their Notice of Race:
 - a. Manual Power

RRS 52 is changed to:

A boat's standing rigging, running rigging, and spars shall be adjusted and operated only by the power provided by the crew. However, autopilots may be used to adjust and operate moveable hull appendages. The autopilots shall only use measurements of weather, wind, or sea surface within 100 millimetres of sensors that are mounted on the boat, and therefore the use of cameras, lidar, sonar, or radar to measure the sea surface surrounding the boat is prohibited.

b. Outside Help

Add to RRS 41:

However, in exception to rule 41(c), weather information that is available to all boats for a fee may be received, but it shall not include specific weather or routing advice customised for the boat or a group of boats.
